---

Sean and Davis,

Attached is the daily report for the oversight of the surface sediment sampling on Tuesday. Representative photographs were emailed to you during the day yesterday.

The crew didn't experience any sampler refusal on hard sediment but 2 locations at Swan Island Lagoon were inaccessible due to barges or ships moored at the primary location and AECOM moved to the alternative locations.

Julee observed that the fish acoustics boat heading in to Swan Island Lagoon around noon yesterday and I just received a message from Jason Silvertooth that AECOM deployed 14 receivers yesterday without EPA oversight.

There will be no sediment sampling today (both crews are taking a day off) but the sediment sampling will resume with both boats on Thursday and continue through the weekend. Jason Silvertooth is providing oversight of the fish acoustics receiver deployment today.

Thanks,

Howard S. Young, LG | CDM Smith
